

Nora Brennan – Therapist & Tutor

Working with Neurological Conditions

This 2 day workshop provides qualified Craniosacral Therapists (and others by arrangement) an opportunity to further their knowledge and increase their confidence when working with the nervous system. Through theory and practical work participants will gain insight into how to work with those with complex neurological presentations and will also have the opportunity to bring their own experiences for feedback and discussion.

During the 2 days we will cover the following (but this is not an exhaustive list):

- A recap of the anatomy of the nervous system – theoretical and practical
- Pathophysiology of some of the more common conditions (eg: Acquired brain injury including stroke, Multiple Sclerosis, Parkinson's Disease)
- A holistic and integrated assessment and treatment approach
- Working with physical, cognitive, communication and behavioural difficulties
- Current understanding of neuroplasticity and its implications for CST
- Practical implications for our practice including clinic facilities, consent, safeguarding and awareness of issues outside the treatment room

ELIGIBLE AS PRIMARY CPD FOR THE CSTA

Location:

London TBC

Course dates: 8th-9th June 2019 (9.30am – 5.30pm)

Price: £210 (£180 early bird if paid in full by 28th February 2019)

Your place will be confirmed on receipt of full payment.
